Care instructions for sofas filled with natural feathers:

Feather-filled sofas and pillows require delicate, manual shaping to allow for an injection of air to remove spots of feather buildup (and avoid a lumpy appearance). Seats with this type require systematic shaping of the parts containing feathers.
Regular manual smoothing will prolong the good condition of the sofa.

Use of sofas filled with natural feathers:

When using this type of seat, feathers may come out of the padding. This is due to the feather shafts which can pierce the fabric. It is a completely natural process.

DO NOT VACUUM SOFAS WITH FEATHERS INSIDE

- FRE -

Instructions d'entretien pour les canapés remplis de plumes naturelles:

Les canapés et oreillers remplis de plumes nécessitent un modelage manuel et délicat pour permettre une injection d'air afin d'éliminer les points d'accumulation de plumes (et éviter une apparence bosselée). Les sièges comportant ce type nécessitent un façonnage systématique des parties contenant des plumes.
Un lissage manuel régulier prolongera un bon état du canapé.

Utilisation de canapés remplis de plumes naturelles:

Lors de l'utilisation de ce type de siège, des plumes peuvent sortir du rembourrage. Cela est dû aux axes de plumes qui peuvent percer le tissu. C'est un processus complètement naturel.

NE PAS ASPIRER LES CANAPÉS AVEC LES PLUMES A L'INTERIEUR

- GER -

Pflegehinweise für Sofas mit Naturfedernfüllung:

Mit Federn gefüllte Sofas und Kissen müssen sorgfältig von Hand geformt werden, damit Luft eingeblasen werden kann, um Federansammlungen zu entfernen (und ein klumpiges Aussehen zu vermeiden). Bei dieser Art von Sitzen müssen die mit Federn gefüllten Teile systematisch geformt werden. Regelmäßiges manuelles Glätten verlängert den guten Zustand des Sofas.

Verwendung von Sofas mit Naturfedernfüllung:

Bei diesem Sofatyp können sich die Federn von der Polsterung ablösen. Das liegt daran, dass die Federschäfte in den Stoff eindringen können. Das ist ein ganz natürlicher Vorgang.

SOFAS MIT FEDERFÜLLUNG NICHT VAKUUMIEREN

Istruzioni per la cura dei divani imbottiti in piume naturali:

I divani e i cuscini imbottiti di piume richiedono una modellatura manuale delicata per consentire un'iniezione di aria per rimuovere le macchie di accumulo di piume (ed evitare un aspetto grumoso). Sedili di questa tipologia richiedono una sagomatura sistematica delle parti contenenti piume.

Una lisciatura manuale regolare prolungherà le buone condizioni del divano.

Utilizzo di divani imbottiti in piume naturali:

Utilizzando questo tipo di sedile è possibile che dall'imbottitura fuoriescano delle piume. Ciò è dovuto agli steli delle piume che possono perforare il tessuto. È un processo completamente naturale.

NON ASPIRARE I DIVANI CON PIUME ALL'INTERNO

- SPA -

Instrucciones de cuidado para sofás rellenos de plumas naturales:

Los sofás y almohadas rellenos de plumas requieren una forma manual y delicada para permitir una inyección de aire para eliminar las manchas de acumulación de plumas (y evitar una apariencia grumosa). Los asientos de este tipo requieren un modelado sistemático de las piezas que contienen plumas.
El alisado manual regular prolongará el buen estado del sofá.

Uso de sofás rellenos de plumas naturales:

Al utilizar este tipo de asiento, pueden desprenderse plumas del acolchado. Esto se debe a que los tallos de las plumas pueden perforar la tela. Es un proceso completamente natural.

NO ASPIRA SOFÁS CON PLUMAS EN EL INTERIOR

- POR -

Instruções de cuidados para sofás cheios de penas naturais:

Sofás e travesseiros cheios de penas requerem modelagem manual delicada para permitir uma injeção de ar para remover manchas de acúmulo de penas (e evitar uma aparência irregular). Assentos deste tipo requerem modelagem sistemática das partes que contêm penas.

O alisamento manual regular prolongará o bom estado do sofá.

Utilização de sofás preenchidos com penas naturais:

Ao utilizar este tipo de assento, podem sair penas do forro. Isto se deve às hastes das penas que podem perfurar o tecido. É um processo completamente natural.

NÃO ASPIRE SOFÁS COM PENAS DENTRO
